

# NeXt

TECHNOLOGY: **SLA / FRSLA**

APPLICATIONS: **Aerospace / Automotive / Consumer Products & Electronics /  
Low Volume Manufacturing Applications / Toughness Required**

**DESCRIPTION:**

NeXt is an extremely durable stereo lithography (SLA) resin that produces very accurate parts with high feature detail. NeXt is a next generation of material that facilitates the production of tough, complex parts with improved moisture resistance and greater thermal properties.

NeXt produces parts that are much more resistant to breakage than parts made with standard SL resins. It is ideal for Functional end-use performance prototypes, like: snap-fit designs, impellers, duct work, connectors and electronic covers, automotive housings and dashboard assemblies, packaging and sporting goods.
